NETT PRICE

Ideal for those seeking basic health checks to monitor their general well-being.

适合寻求基本健康检查以监测整体健康状况的人群。

All health screening packages comes with a medical consultation session with our doctor and Medical Report, Consultation and Lifestyle Counselling.

所有健康筛查套餐均包含与我们的医生会诊和医疗报告、咨询和生活方式建议。

Clinical Assessment 临床评估

Height, Weight, BMI 身高, 体重, 身体质量指数
Blood Pressure Measurement 血压测量
Waist and Hip Circumference 腰围和臀围
Visual Acuity 视力
Colour Vision 色觉

Hematology 血液学

Full Blood Examination 血液细胞分析

Kidney Function 肾脏功能检测

Urea 尿素
Creatinine 肌酐
Sodium 钠
Potassium 钾
Chloride 氯
eGFR 肾小球滤过率估计

Diabetes Screen 糖尿病筛查

Fasting Blood Glucose 血糖
HbA1C 糖化血红蛋白

Bone and Joint Screen 骨与关节筛查

Calcium 钙
Uric Acid 尿酸
Phosphate 磷酸盐

Liver Function 肝功能

Total Protein 总蛋白
Albumin 白蛋白
Globulin 球蛋白
A/G Ratio 白球比值
Total Bilirubin 总胆红素
Alkaline Phosphatase 碱性磷酸酶
SGOT (AST) 谷草转氨酶
SGPT (ALT) 谷丙转氨酶
GGT 谷氨酰转肽酶

Lipid Profile 脂质检查

Total Cholesterol 总胆固醇
Triglycerides 甘油三酯
HDL Cholesterol 高密度脂蛋白胆固醇
LDL Cholesterol 低密度脂蛋白胆固醇
Cholesterol Ratio 胆固醇比率

Urine Analysis 尿液分析检验

Microscopic Examination 显微镜检查
pH 酸碱度
Protein 蛋白质
Blood 血液
White Blood Cell 白细胞
Bacteria 细菌
Crystal 结晶

Essential package

188^{RM}

Nuts Mix 坚果

Almond 杏仁
Brazil Nuts 巴西坚果
Cacao 可可豆
Hazelnut 胡桃
Peanut 花生
Pine Nut 松子
Sunflower seed 葵花籽
Sweet chestnut 栗子
Walnut 核桃

Fruit Mix 水果

Apple 苹果
Banana 香蕉
Citrus 柑橘
Kiwi 猕猴桃
Mango 芒果
Orange 橙
Peach 桃子
Strawberry 草莓

Meat 肉类

Beef 牛肉
Chicken 鸡肉
Lamb 羊肉
Pork 猪肉
Silkworm pupa 蚕蛹

Seafood Mix 海鲜

Alaska Pollock 阿拉斯加鳕鱼
Anchovy 凤尾鱼
Blue Mussel 蓝贻贝
Clam 蛤蜊
Codfish 鳕鱼
Crab 螃蟹
Eel 鳗鱼
Lobster 龙虾
Mackerel 鲭鱼
Oyster 生蚝
Plaice 比目鱼
Salmon 三文鱼
Scallop 扇贝
Shrimp 虾
Squid 鱿鱼
Tuna 金枪鱼

Pet Dander Mix 宠物皮屑

Cat 猫
Dog 狗
Guinea pig 豚鼠
Hamster 仓鼠

Rabbit 兔子
Rat 老鼠
Sheep 绵羊

Insect 昆虫

Bee Venom 蜜蜂毒
Wasp Venom 黄蜂毒

House Dust Mix 尘螨

Acarus Siro 粮螨
Cockroach 蟑螂
Dermatophagoides Farinae 面包螨
Dermatophagoides Pteronyssinus 尘螨
House Dust 室内尘埃
Tyrophagus putrescentiae 腐霉螨

Mould Mix 霉菌

Alternaria Alternate 交替曲霉
Aspergillus Fumigatus 烟曲霉
Candida Albicans 白色念珠菌
Cladosporium Herbarum 草曲霉
Penicillium Notanum 青霉素霉菌

Tree Pollens 树木花粉

Acacia 刺槐
Alder 桤木
Birch 桦树
Cottonwood 杨树
Eucalyptus 桉树
Hazel 榛树
Hevea Latex 树胶
Japanese Cedar 日本杉
Maple leaf sycamore 枫叶悬铃木
Oak 橡树
Olive 橄榄
Pine 松树
White ash 白蜡树
White pine 白松
Willow 柳树

Grass Mix 杂草

Bahia Grass 巴哈草
Bermuda Grass 百慕大草
Common Pigweed 番杏草
Dandelion 蒲公英
Goldenrod 一枝黄花
Johnson Grass 强力草
Meadow Grass 草地草
Ox-eye Daisy 眼子菜
Plantain 车前草
Russian Thistle 俄罗斯蓟
Rye Grass 黑麦草
Timothy Grass 提莫西草

FAQ

MediHome Clinic
一家诊所

FAQ General Screening

1. How can I book an appointment?

You may book an appointment directly through our self-booking portal: <https://www.medihomeclinic.com/book>

To see our doctors' roster, including availability of female doctors, please check our social media platforms.

Instagram: <https://www.medihomeclinic.com/ig>

Facebook: <https://www.medihomeclinic.com/fb>

For assistance with booking, feel free to contact us via WhatsApp at <https://www.medihomeclinic.com/wa>

2. Is there anything I need to prepare for a health screening?

- Fasting: Please fast for at least 8 hours before your appointment. Only plain water is allowed during this time.
- Personal Items: We recommend not bringing valuables or jewelry to your screening.

For Ladies:

- Please avoid scheduling a health screening during your menstrual period. It's best to book your appointment at least 5 days after your period ends.
- If you are menstruating on the day of your appointment, inform the doctor. Pap smear and urine tests cannot be done during menstruation as the presence of blood may affect the accuracy of the results.

FAQ General Screening

3. How long does the health screening take?

The duration typically ranges from 30 to 45 minutes, depending on the selected health screening package.

4. When will I receive my results?

Blood test results will be available within 3 to 5 working days, depending on the selected health screening package. You can schedule a follow-up appointment for report collection and consultation on the same day as your screening, or our nurse will contact you to arrange a suitable date and time once your report is ready.

5. What are the differences between packages?

Premium (RM388) vs Signature (RM288)

- **Gentleman:** There will be included 3 ultrasound scans instead of 1 only.
- **Ladies:** There will be included 2 ultrasound scans and Pap smear examination instead of 1 ultrasound scan only.

Female (RM499) vs Premium (RM388)

- Additional hormonal studies in female package.

You may view a comparison chart of the packages at medihomeclinic.com/compare or contact us for further assistance.

FAQ General Screening

6. Does the RM88 blood test package include a female ultrasound scan?

No, the RM88 package only covers a clinical assessment and does not include ultrasound scans. Ultrasound scans are available with the **Signature** package and above.

7. I'm unsure which package to sign up for. Which one do you recommend?

We recommend the **Signature** package as the top choice for annual health screenings. If you're still unsure, you may view a comparison chart of the packages at medihomeclinic.com/compare or contact us for further assistance.

8. Do I need to choose a health screening package before making an appointment?

You may book an appointment at our clinic as a general health screening or body check-up. After fasting for at least 8 hours, you may consult with our doctors on the day of your appointment to decide on the appropriate package before any blood tests are done.

FAQ General Screening

9. Which package includes all the ultrasound scans?

VIP package.

You may view a comparison chart of the packages at [medihomeclinic.com/compare](https://www.medihomeclinic.com/compare) or contact us for further assistance.

10. How often should I undergo a health screening?

If your blood test results are normal, an annual screening is usually sufficient. However, if any abnormalities are found, please consult us to determine how frequently you should repeat the tests.

11. Who should get a Pap smear, and why is it important?

We recommend that women aged 21 and above have a Pap smear. It is a crucial screening test for the early detection and prevention of cervical cancer.

FAQ General Screening

12. Can I walk in without an appointment?

Yes, if you've fasted properly and are not on your period, you may walk in for a health screening. However, please note that there may be a longer wait if we have scheduled appointments.

13. Can I do a health screening without fasting?

We can still perform the health screening, but tests like blood sugar and cholesterol levels may not be as accurate without proper fasting.

14. Can I bring my children with me for the health screening?

Yes, you may bring your children. We have a kid's area in the clinic where they can spend time while you complete your screening.

FAQ General Screening

15. How can I check the doctors' roster?

To see our doctors' roster, including availability of female doctors, please visit the link below.

<https://www.medihomeclinic.com/schedule>

16. How can I check the latest promotions?

All updates on our latest promotions are posted on our social media platforms.

Instagram: <https://www.medihomeclinic.com/ig>

Facebook: <https://www.medihomeclinic.com/fb>

FAQ Female/Pregnancy Screening

1. What are the differences between the packages?

MediHome Clinic vs Klinik Kesihatan (KK) Pink Book

- The MediHome Clinic Pink Book functions as a pregnancy record, similar to the KK Pink Book, documenting each follow-up with our clinic to maintain an up-to-date health record through to delivery. It can also serve as a reference when visiting a government or private hospital in case of emergencies or during delivery.

2D Detail Scan vs 5D Scan

- **2D Detail Scan:** Offers detailed images of internal organs, monitors the baby's movements, and helps assess fetal growth and development. It is useful for detecting structural abnormalities, checking amniotic fluid levels, and evaluating the baby's position and overall health.
- **5D Scan:** Combines 3D imaging with real-time motion (4D), providing clearer, more defined images, especially of facial features, for a more vivid view of the baby.

2D Detail Scan vs NICC Blood Tests

- **2D Detail Scan:** A structural ultrasound that examines the baby's anatomy and can detect physical abnormalities such as heart defects, neural tube defects, cleft lip, and spinal issues.
- **NICC Blood Test:** A genetic blood test that screens for chromosomal abnormalities, such as Down syndrome, early in pregnancy.

FAQ Female/Pregnancy Screening

NICC Basic vs NICC Extended

- **NICC Basic:** Screens for aneuploidy in all 23 chromosomes, including conditions like Down syndrome, Edwards syndrome, Patau syndrome, and sex chromosome abnormalities such as Turner syndrome and Klinefelter syndrome.
- **NICC Extended:** Includes all tests from the Basic package, with the addition of screening for 92 types of microdeletions, such as Angelman syndrome and Prader-Willi syndrome.

NICC vs NIPT

- **NICC:** Stands for Non-Invasive Chromosome Count, a test trademarked by DNA Lab.
- **NIPT:** Stands for Non-Invasive Prenatal Testing, a term used for similar tests provided by other labs. While equivalent to NICC, NIPT refers to services offered by labs outside of DNA Lab, as NICC is a trademarked name.

2. Why and when should I open a pink book?

The Pink Book serves as a comprehensive pregnancy record, documenting every detail of your antenatal check-ups to ensure an up-to-date health record until delivery. It also provides essential information in case of an emergency. We

We recommend opening a Pink Book between 8 and 13 weeks of pregnancy.

FAQ Female/Pregnancy Screening

3. When should I do the tests/scans?

- **NICC Test:** We recommend taking the NICC test from 10 weeks onwards to ensure there is enough fetal DNA in the mother's blood for accurate results.
- **2D Detail Scan:** Best performed between 18 and 26 weeks to evaluate the baby's anatomy.
- **5D Scan:** Ideal between 24 and 32 weeks for clearer imaging and detailed views of facial features.

4. Do I need to fast before the NICC blood test?

No, fasting is not required prior to the NICC blood test.

5. What do I need to prepare for Detail or 5D scan?

For the 5D scan, please allow at least 30 minutes for the appointment. If the doctor is unable to capture the baby's face within this time, you may be asked to take a walk and return, or to reschedule for a second attempt. Additionally, please empty your bladder before the ultrasound scan to ensure clearer imaging.

6. Will I be charged if the baby's face is covered by hands or if they are not in a good position?

If more than 50% of the baby's face is covered during the scan, we will offer a complimentary rescan, and only one payment will be collected.

Ultrasound Scans & Vaccines

MediHome Clinic
一家诊所

Ultrasound Scan

超音波扫描

Essential Ultrasound Scan Package

♀ **Female Ultrasound (C + F)**
RM 180 (Usual Price: RM 200)

♂ **Male Ultrasound (B + D + G)**
RM 180 (Usual Price: RM 200)

Abdomen Ultrasound Scan Package

♀ **Female Abdomen (A + B + C)**
RM 300 (Usual Price: RM 330)

♂ **Male Abdomen (A + B + D + G)**
RM 300 (Usual Price: RM 320)

A	Liver, Bile Ducts, Pancreas 肝脏、胆管、胰腺	RM 120
B	Kidneys, Ureters, Bladder 肾脏、输尿管、膀胱	RM 90
C	Pelvis (Uterus, Ovaries) 盆腔(子宫、卵巢)	RM 120
D	Prostate 前列腺	RM 50
E	Thyroid 甲状腺	RM 90
F	Breasts 乳房	RM 80
G	Testis 睾丸	RM 60
H	Lump and Bump 瘤	RM 60
I	Doppler Lower Limb for Blood Clot 下肢血栓多普勒超声 检查	RM 90/Limb
J	Carotid Doppler 颈动脉多普勒超声 检查	RM 100

Vaccination (Adult) 成人疫苗接种

Vaccine 疫苗	Dosage(s) 剂量	Price per dose 每剂价格
Influenza 流感	1 dose annually	RM 75
Typhoid 伤寒	1 dose (every 3 years)	RM 70
Hepatitis A A型肝炎	2 doses (6 months interval)	RM 170
Hepatitis B B型肝炎	3 doses (1 & 6 months interval)	RM 65
Meningococcal 脑膜炎球菌	1 dose (lasts 5 years) Mandatory for pilgrimage	RM 150
Dengue Fever 骨痛溢血热症	2 doses (3 months interval)	RM 225
Human Papillomavirus HPV 人乳头瘤病毒	3 doses (2 & 6 months interval)	RM 550
Adacel DTap 白喉,破伤风,百日咳	1 dose	RM 120

Child Vaccination

MediHome Clinic

Basic package

88^{RM}

NETT PRICE

Ideal for those seeking basic health checks to monitor their general well-being.

适合寻求基本健康检查以监测整体健康状况的人群。

All health screening packages comes with a medical consultation session with our doctor and Medical Report, Consultation and Lifestyle Counselling.

所有健康筛查套餐均包含与我们的会 诊和医疗报告、咨询和生活方式建议。

Clinical Assessment 临床评估

Blood Pressure Measurement 血压测量

Hematology 血液学

Full Blood Examination 血液细胞分析

Kidney Function 肾脏功能检测

Urea 尿素
Creatinine 肌酐
Sodium 钠
Potassium 钾
Chloride 氯
eGFR 肾小球滤过率估计

Diabetes Screen 糖尿病筛查

Fasting Blood Glucose 血糖
HbA1C 糖化血红蛋白

Bone and Joint Screen 骨与关节筛查

Calcium 钙
Uric Acid 尿酸
Phosphate 磷酸盐

Liver Function 肝功能

Total Protein 总蛋白
Albumin 白蛋白
Globulin 球蛋白
A/G Ratio 白球比值
Total Bilirubin 总胆红素
Alkaline Phosphatase 碱性磷酸酶
SGOT (AST) 谷草转氨酶
SGPT (ALT) 谷丙转氨酶
GGT 谷氨酰转肽酶

Lipid Profile 脂质检查

Total Cholesterol 总胆固醇
Triglycerides 甘油三酯
HDL Cholesterol 高密度脂蛋白胆固醇
LDL Cholesterol 低密度脂蛋白胆固醇
Cholesterol Ratio 胆固醇比率

Urine Analysis 尿液分析检验

Microscopic Examination 显微镜检查
pH 酸碱度
Protein 蛋白质
Blood 血液
White Blood Cell 白细胞
Bacteria 细菌
Crystal 结晶

Essential package

188^{RM}
